Profile

Data-driven Agricultural Engineer with an MBA in Data Science & Analytics, postgraduate diplomas in Monitoring & Evaluation (MEAL) and in Public Health Research. Over 5 years of experience working with UN agencies, NGOs, and USAID projects in the areas of Data Management, MEAL, and research conduct. Proficient in tools such as R, STATA, Python, Excel, ArcGIS, QGIS, and data storytelling, transforming complex information into practical insights that support strategic decision-making. Developer of **PMEAL Explorer 360**, an integrated platform for project and data management, monitoring and evaluation, GIS, and reporting.

Work Experience

▪ Apr, 2024 – May, 2026 | Data and Information Officer – UNICEF Mozambique

- Developed a Python code for data integration, reducing the aggregation process from multiple sources (Excel, KoboCollect, ODK) from weeks to seconds, achieving 95% efficiency.
- Applied Machine Learning models (Boosting and Deep Learning) to predict districts affected by El Niño with 80% accuracy, and Random Forest to predict cholera outbreaks with 86% accuracy, ensuring the pre-positioning of supplies in Sofala (2025).
- Supported the training of over 100 technicians and enumerators from SDAE and SDSMAS in 2 provinces (Sofala, Zambézia) for data collection via KoboCollect in emergency contexts, post-shock surveys, Integrated Mobile Brigades, and mapping of Food and Nutrition Security activities.
- I have provided support in program planning with implementing partners, data management, activity monitoring, and reporting for the Health and Nutrition section and cluster.

▪ Aug, 2022 – Dec, 2023 | Field Officer & Call Center Agent – GiveDirectly

- Registered and monitored over 950 beneficiaries in extreme poverty communities, ensuring the successful receipt of cash transfers in Nhamatanda.
- Efficiently supported beneficiaries via Call Center, mastering complex case resolution and ensuring a quality experience and agile response to beneficiary needs.
- Led research funded by USAID and Google, and integrated feedback to drive evidence-based program decisions. Recognized [as the top employee](#) due to performance, dedication, and beneficiary advocacy.

▪ June, 2022 – July, 2022 | Field Qualitative Researcher – FAO

- Conducted qualitative field research, reaching over 220 farmers in Manica to understand the experiences of farmers benefiting from FAO post-cyclone agricultural support programs, generating relevant insights for improving interventions.

▪ Mar – May, 2022 | Research Assistant | ONU-WIDER / Mozambique Inclusive Growth

- Assisted with research [in manufacturing industries across 5 provinces](#) (Maputo City, Maputo Province, Gaza, Sofala and Manica), collecting and analyzing data to understand industrial development trends over time.
- Conducted structured interviews and surveys with over 350 manufacturing firms, collecting quantitative and qualitative data.
- Helped draft policy-relevant summaries and visualizations (charts, trend lines) used in internal reports for ONU-WIDER.

Education

- 2024 - 2026: MBA in Data Science & Analytics from the **University of São Paulo** (USP-ESALQ), Brazil.
- 2024 - 2025: Advanced Postgraduate Diploma in Public Health Research from **the James Lind Institute**, Switzerland.
- 2023 - 2024: Postgraduate Diploma in Monitoring, Evaluation, Accountability, and Learning (MEAL) from the **World Academy for Research and Development**, United Kingdom.
- 2017-2021: Bachelor's in Agronomic Engineering from the **University of Zambeze - Faculty of Agronomic and Forestry Engineering**, Mozambique.

Publications

- **Scientific Article** - Cross-pathogenicity of three (3) isolates of Colletotrichum spp. in two (2) tropical fruits.
- **Scientific Article** - Morpho-physiological characterization of three Colletotrichum spp. isolates subjected to different broth culture and temperatures.
- **Success Story** - *A dedicação de uma jovem mãe pela saúde e bem-estar da sua comunidade.*
- **Success Story** - *Entre a seca e a esperança: A luta de Eva pela sobrevivência da pequena Zelinha.*
- **Success Story** - *Uma mãe determinada a garantir um futuro saudável para os seus filhos.*
- **Success Story** - *Força de uma mãe em tempos de seca.*

Technical Skills

- Big Data Management & Data Analytics
- GIS & Remote Sensing
- MEAL (Monitoring, Evaluation, Accountability & Learning) and Research
- Planning & Reporting
- Machine Learning, Deep Learning, and Support Vector Machine
- Community Engagement & Advocacy
- Operational Research and Data-Driven Decision Making
- Leadership & Team Management
- Programming in Python & R

Certifications

- Certificates and licenses available on LinkedIn via this link.

Projects

PMEAL Explorer 360 – An integrated platform for data management, Machine Learning, Monitoring, Evaluation, Accountability, reporting and Learning, for development and humanitarian organizations.
